180° Swiveling Valve Operator

E.H. Wachs TM-7 Valve Operators offers 180° swivel capability for bed or trailer mount installation. The swiveling action easily allows for centering over valves from the drivers' side to the passenger side or any location in-between. The TM-7 operating head extends out 27" and will accept 15° of misalignment making connection to the valve a snap.

The Swiveling TM-7 can be built to meet specific customer needs or conjunction with Wachs Transportable Clean-up / Clean-out vacuums and pressure washers to provide a complete Wachs Valve Maintenance System.
